

P. T. Marshall

The Robert Jones & Agnes Hunt
Orthopaedic Hospital,
Oswestry.

Forty-second
ANNUAL
REPORT

1942.

22502911551

Aims and Objects

OF THE
ROBERT JONES AND AGNES HUNT
ORTHOPAEDIC HOSPITAL.

Extract from TRUST DEED.

The objects of the Hospital shall be as follows :—

(a) *Prevention.*

To provide lectures, lantern slides, cinematographs, and generally any form of propaganda with a view to the prevention of crippling diseases.

(b) *Treatment.*

To provide or cause to be provided institutions, laboratories, shelters, homes, dispensaries, massage departments and other Hospital buildings, incidental to the treatment of persons suffering or likely to suffer or who may have suffered from crippling diseases.

(c) *After Care.*

To appoint duly qualified Orthopaedic Surgeons and Nurses in connection with the scheme of After Care, and in connection therewith to establish or cause to be established Treatment Centres, and to provide, upon payment, all splints and appliances and other mechanical aids for patients and surgical alterations to boots or other articles used by patients as may be necessary.

(d) *School for Medical Men and Orthopaedic Nurses.*

To establish and maintain a school for training Medical Men and Orthopaedic Nurses and preparing students for the examinations of the Chartered Society of Massage and Medical Gymnastics.

(e) *Training.*

To make arrangements whereby training for persons suffering from, likely to suffer, or who may have suffered from crippling diseases may be provided.

(f) *Education.*

To provide (in manner approved by the Board of Education) for the education of children who may be patients in the Hospital.

(g) To carry on any kind of work, whether practical or experimental, and to do all other such lawful things as are incidental or conducive to the attainment of the above-named objects.

Preface

MR. CHAIRMAN, LADIES AND GENTLEMEN,

It is rather interesting to review the growth of this Hospital during the 43 years of its existence. It was born in the last year of the Boer War, and it was for children **only**; then, because the need was great, women and children were taken. Then one or two urgent cases of men were surreptitiously admitted. I remember the first man we had, a very acute tubercular knee, and I, trusting that the Committee would not come round the wards, put him in the darkest corner. Of course Miss Eliza Kenyon must needs come and after looking at him asked what age that boy was. Firmly I replied, "14 years." Her only answer was "He has a fine moustache for his age!" After that men were gradually admitted.

Then came the Great War and the Hospital grew by means of marquee tents supplied by the Military to 300 beds for men, women and children. Then Mrs. Mainwaring lent us her house for soldiers and other ladies took some in. These were visited once a week. Our transport was one borrowed ancient Ford open four-seater and one new Ford ambulance, not too comfortable. Also, the After-Care had started and had three motor cycles. Before the war ended we had 150 civilian men, women and children, 70 to 80 soldier pensioners and about 220 soldiers. So when we took over this big hospital we had no difficulty in filling the beds.

I believe we have during this last and most terrible war grown to 470 beds in the hospital, 70 at Aston and 60 at Gredington. I do, however, most sincerely hope that when it will please God to give us peace that the Hospital will diminish and not increase, because I am quite certain that a 300-bedded hospital is more efficient than a big unwieldly hospital, that would of necessity become departmental.

A. G. HUNT.

July 12, 1943.

Forty-second Annual Report, 1942

THE Board of Management has pleasure in presenting its report for the year 1942.

Throughout the year the Hospital, its two annexes at Gredington and Aston Hall and other ancillary departments became increasingly busy, more patients being admitted to the wards and to the various clinics in the After Care area.

As in the immediately preceding years this report must be brief and be confined chiefly to statistical records.

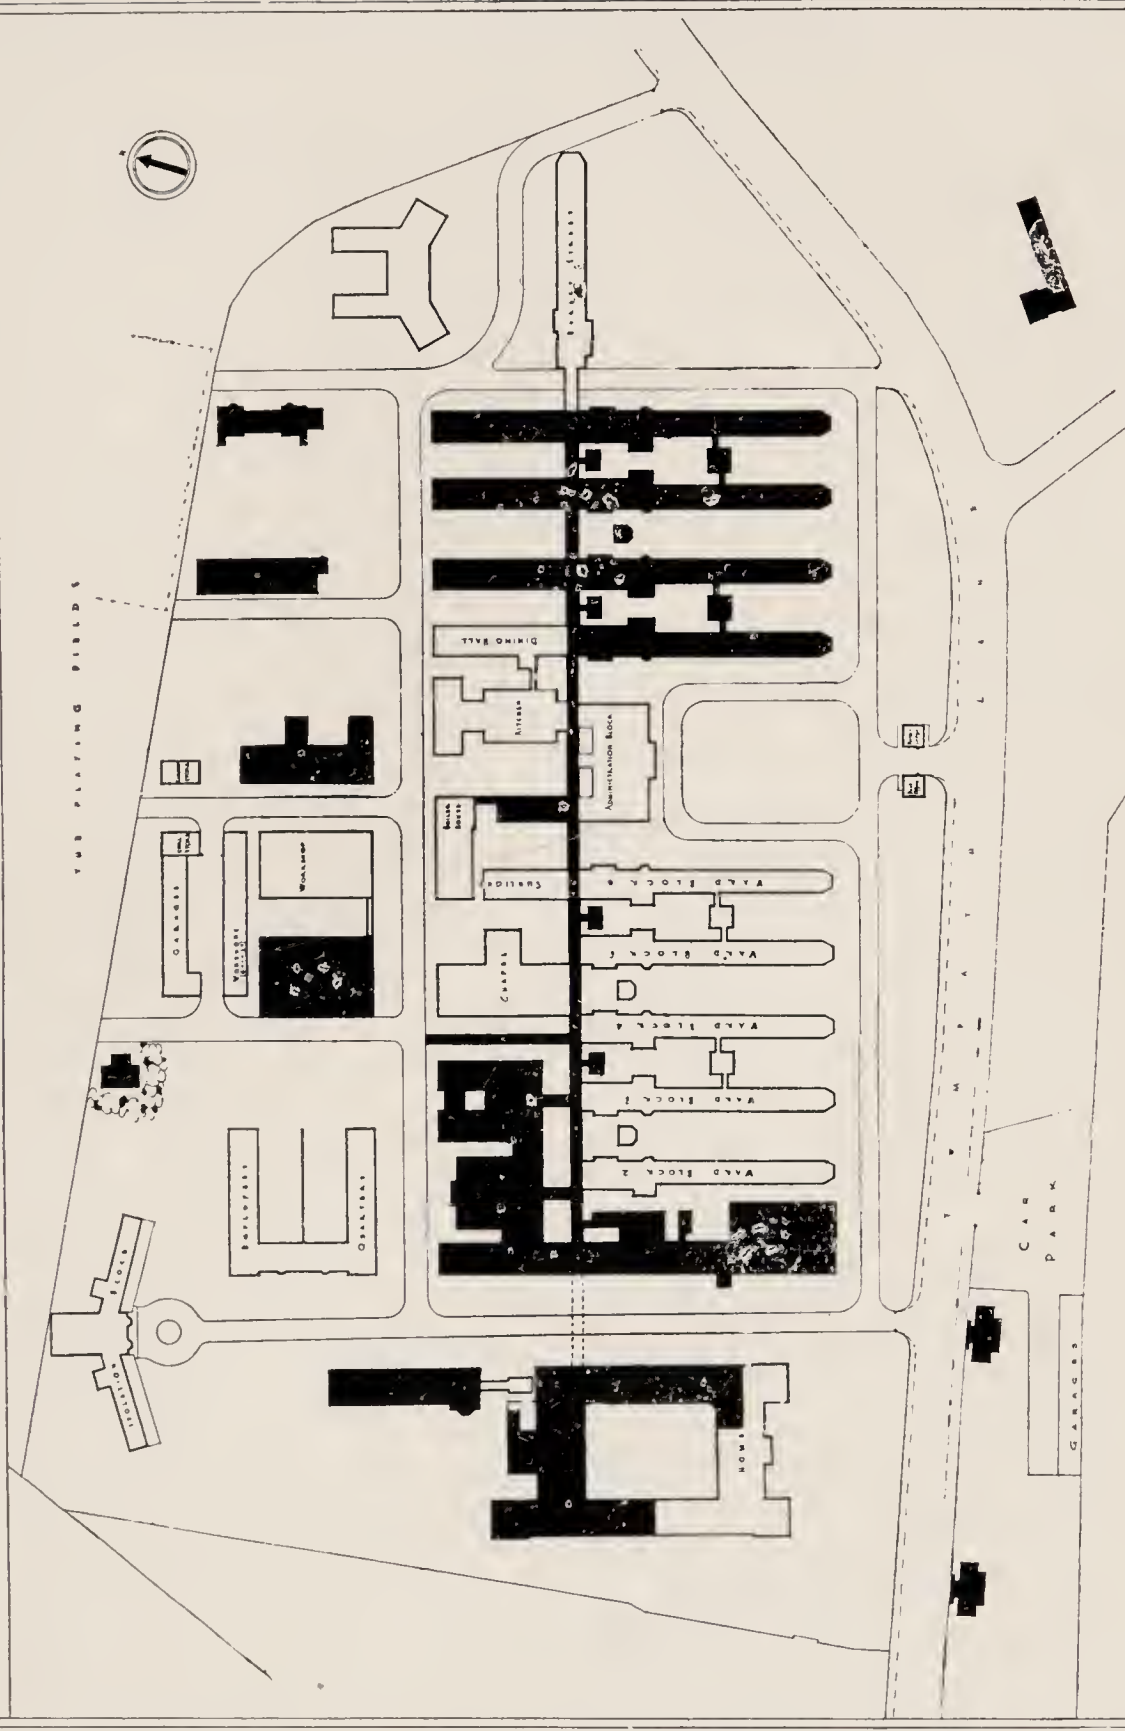

The condition of the fabric of the five old wards and certain other buildings, the reconstruction of which was interrupted by the outbreak of hostilities, continues to cause the Board of Management considerable anxiety. We are at the present time in communication with the Ministry of Health with a view to deciding whether these buildings should be the subject of major structural repairs or piecemeal gradual reconstruction in accordance with a modified specification which has been submitted to the Ministry of Health by the Architect.

The Scheme of After Care we are pleased to say, in spite of a restricted supply of petrol, and inability to replace old motor-cars, continues to function satisfactorily except that the visiting of patients in their homes has had to be seriously curtailed.

The number of patients needing admission into hospital, and for whose treatment no provision is made by the State, continues to increase. During the year the number of such cases dealt with by the Samaritan Fund was 698. These patients included a large number of industrial and domestic accidents; to a great extent workers in industry have made their own provision for hospital treatment through their membership of Hospital Contributory Schemes which make a contribution towards the cost of treatment, although in many cases such contribution is only a portion of the actual cost. Membership of such schemes has, in our experience,

THE ROBERT JONES AND AGNES HUNT ORTHOPÆDIC HOSPITAL, OSWESTRY

Scale 1/4" = 100'

CHARLES SAVON PAISA FET CURTINER & REGISTERED ARCHITECT CATHERINE CHAMBERS CATERER

Buildings shown in black have been erected under the scheme of gradual reconstruction.

increased very considerably in recent years, and at the same time the Government had extended the provision of institutional treatment. The Emergency Medical Service of the Ministry of Health was created at the beginning of the war to provide treatment for civilian war casualties and Service cases. This Scheme has been extended to include evacuees, patients transferred from other hospitals to free hospital beds in a vulnerable area, transferred war workers, and Civil Defence Workers, Women's Land Army and fracture cases in manual workers engaged in war industry. Such patients, however, are expected to contribute towards the cost of their treatment according to their means, or if a contributor, through the agency of the Contributory Scheme. It is important to emphasise the position of other persons injured in industry not connected with the war, a large number of whom are under the mistaken impression that the cost of hospital treatment is met by the provisions of the Workmen's Compensation Act. This Act makes no provision for hospital treatment of people injured at work, but only provides weekly compensation for the injured workmen.

Except for specialised classes of people the Government provision is, in the main, for treatment of cases of fracture and there is no provision for patients suffering from other conditions. The cost of treatment of patients suffering from other orthopaedic conditions continues to fall upon the patients themselves or Hospital Contributory Schemes of which they might be members, or upon voluntary funds.

Once again we would like to express our great debt of gratitude to the Voluntary Orthopaedic Associations and Committees who continue to work throughout the year to assist patients to obtain hospital treatment, often for long periods. The Samaritan Fund could not possibly have made financial arrangements for these patients to receive adequate treatment if it were not for the magnificent work of the Voluntary Orthopaedic Associations; their work is invaluable not only from the financial but also from the social point of view. On behalf of the patients and the Board of Management we ask them to accept our gratitude and appreciation.

The General Income and Expenditure Account again shows an excess of income over expenditure. The surplus amounts to £167 3s. 5d. after transferring £500 to the Building Fund Account.

A sum of £16,624 was received from the Ministry of

Health in respect of the cost of treatment of patients under the Emergency Medical Services Scheme. This amount is subject to revision on presentation to the Ministry of the actual costs incurred by the Hospital.

The daily average number of patients was 505 which includes the patients treated at the Annexes at Gredington and Aston Hall. This figure exceeds the daily average of 1941 by 20 in-patients daily.

The number of out-patients treated at the Clinics totalled 10,325 compared with 9,667 during the previous year. Attendances totalled 26,330.

It is a pleasure to be able to report that it has been agreed, after consultation with the Shropshire Voluntary Hospitals Contributory Association, that this hospital shall become a participating hospital of the Shropshire Voluntary Hospitals Contributory Association, but that in view of its special financial policy it should not participate on the same basis of allocation as the other participating hospitals. It was agreed that distribution should be made on the basis of the number of in-patient days for which members of the Association were resident in the Orthopaedic Hospital, and that the hospital should receive as its allocation of the funds of the Association the same proportion of the cost of maintenance in the Orthopaedic Hospital as the ordinary rate of allocation bears to the cost of maintenance in the Royal Salop Infirmary in any year, with a guarantee that the amount so paid shall not be less than 6/- per diem. This agreement to be for a trial period of one year ending 31st December, 1943.

The thanks of the Board of Management are due to Mr. Menzies and the staff of the hospital who have continued to keep it in what we believe to be a high state of efficiency in spite of all the difficulties of war-time, the great expansion of the hospital, shortage of staff and materials, and increased numbers of statistical returns and forms that are necessary in these times.

My own personal thanks are due to the members of the Board of Management who have managed, in spite of transport difficulties, to continue to attend the various meetings of the Board of Management.

L. E. BURY,
Chairman of the Board of Management.

OPERATIONS, 1942.

Operations on Bones.

1. AMPUTATIONS.

For Congenital Deformity.

Left leg—foot	1
<i>For Injuries—</i>					
Fingers	8
Leg—Above knee	1
„ —Below knee	4
Foot	1
Toes	1

<i>For G.S.W. Finger</i>	1
--------------------------	-------	-------	-------	-------	---

For Tuberculosis.

Knee	1
Ankle	1
Foot	1
Toe	1

For Arthritis.

Toe	1
-----	-------	-------	-------	-------	---

For Sarcoma.

Arm—above elbow	1
Toe	1

For Carcinoma.

Foot	1
------	-------	-------	-------	-------	---

<i>For Hammer Toes and other Toe deformities</i>	28
--	-------	-------	-------	-------	----

<i>For Infected Toe</i>	1
-------------------------	-------	-------	-------	-------	---

<i>For Dupuytren's Contracture</i>	1
------------------------------------	-------	-------	-------	-------	---

2. OPEN REDUCTIONS OF FRACTURES.

Humerus—external condyle	2
Olecranon	1
Radius and ulna	3
Radius	7
Metacarpal	1
Femur	1
Tibia and Fibula	4
Pott's fracture	3
Malleolus	6

3. MANIPULATIONS OF FRACTURES.

Spine	1
Humerus	9
Supracondylar fracture of elbow	2
Radius and Ulna	3
Radius	3
Colles' fracture	9
Radial Styloid	1
Metacarpal	1
Femur	17
Tibia and Fibula	11
Tibia	5
Potts' fracture	7
Os Calcis	6
Malleolus	3
Metatarsal	1

4. BONE GRAFTS.

For Tuberculosis.

Albee fusion	19
--------------------	----

For Un-united Fractures.

Clavicle	2
Humerus	4
Radius and Ulna	2
Radius	1
Ulna	1
Carpal Scaphoid	1
Femur	1
Tibia and Fibula	3
Tibia	8

For Poliomyelitis.

Humeral graft (as block to elbow)	1
---	---

For Congenital Deformity of foot.

Tibial graft	1
--------------------	---

For Scoliosis.

Spine	2
-------------	---

For Spondylolisthesis.

Spine	2
-------------	---

For Slipped Epiphysis.

Fibular	1
---------------	---

For Congenital Absence lower end of Tibia.

Implantation fibula into talus	1
--------------------------------------	---

For Diaphyseal Aclasia.

Implantation lower end radius into ulna	1
---	---

5. OSTEOTOMIES.

For Rickets—bow legs	3
„ old fracture, femur	1
„ „ „ radius	1
„ Slipped Epiphysis—shortening of tibia	1

6. OSTEOTOMIES.

For Tuberculosis.

Hip	4
-----	-------	-------	-------	-------	---

For Congenital Deformity.

Subtrochanteric	1
Supramalleolar	1

For Poliomyelitis.

Supracondylar—of femur	1
------------------------	-------	-------	-------	-------	---

For Fractures.

Humerus	1
Femur	5

For Spastic Paralysis.

Femur	1
-------	-------	-------	-------	-------	---

For Cavus Deformity.

Os Calcis	2
-----------	-------	-------	-------	-------	---

For Arthritis.

Transtrochanteric	2
Subtrochanteric	2
Femoral	2

For Knock-knees.

Supracondylar	2
Tibial	2

For Coxa Vara.

Transtrochanteric	2
Subtrochanteric	5
Femoral	1

For Birth Palsy.

Humeral	1
---------	-------	-------	-------	-------	---

For Hallux Valgus.

Great toe	3
-----------	-------	-------	-------	-------	---

For Arthrogryphosis.

Supra-condylar—of femur	1
-------------------------	-------	-------	-------	-------	---

For Slipped Epiphysis.

Sub-trochanteric	2
------------------	-------	-------	-------	-------	---

7. GUTTERING OF BONE.

For Osteomyelitis.

Humerus	1
Radius	1

For Brodie's Abscess.

Femur	2
Tibia	2

8. SEQUESTRECTOMY.

For Osteomyelitis.

Radius	1
Femur	6
Tibia	4
Metatarsals	1

For Brodie's Abscess. 1*For Fractures.*

Femur	1
Tibia and Fibula	2
Metatarsals	1

9. INSERTION OF STEINMAN'S PIN.

For Fractured Pelvis 1

10. INSERTION OF SMITH PETERSON NAIL.

For Fractured Femur 12

11. INSERTION OF KIRSCHNER WIRE.

For Fractured Humerus	1
„ „ Femur	5
„ „ Tibia and Fibula	8
„ „ Tibia	3

12. MISCELLANEOUS OPERATIONS ON BONES.

For Tuberculous Spine.

Costotransversectomy 1

Excisions.

Trochanter—for Tb. Osteomyelitis	1
3rd lumbar vertebra—For Arthritis	1

Acromion—for supra-spinatus lesion	1
Upper part of Os Calcis—for Apophysitis	1
Accessory Scaphoid from foot	2
Cervical rib	1
Fractured Olecranon process	1
Bony spur	3
Exostosis	11
Distal half proximal phalanx—for Hallux	
Valgus	1
Trimming of Amputation Stump—below knee	4
” ” ” ” —finger	3
Trimming of Metatarsal Heads	31
For fractured thumb—freshening of bone ends	1

Operations on Joints.

1. ARTHRODESIS.

For Tuberculosis.

Shoulder	1
Elbow	1
Hip	8
Knee	22

For Arthritis.

Hip	7
,, 1st Stage			2
,, 2nd Stage			3
Knee	7
Wrist		2

For Poliomyelitis.

Shoulder	2
Thumb.....	1

For Slipped Epiphysis.

Hip 1

For Dislocation.

Hip—1st stage	1
„ 2nd Stage	1
Wrist	1

For Hallux Valgus.

Metatarso-phalangeal 1

For Hammer Toes.

Interphalangeal 10

2. STABILISATION OF FEET.

For Poliomyelitis.

Talipes valgus	2
„ calcaneo-cavus	1
„ equino-cavus	1
„ equino-varus	4
Pes cavus	1
Metatarsus varus	2

For Osteomyelitis.

Talipes equino-varus	1
----------------------	-------	-------	-------	-------	---

For Spastic Paralysis.

Talipes equino-varus	1
„ cavo-varus	1
Pes Cavus	1

For Arthritis.

Talipes equino-cavus	2
----------------------	-------	-------	-------	-------	---

For Congenital Club Foot 6*For Flat Foot* 4*For Arthrogryphosis—talipes equino-varus* 2*For Injury—talipes equino-varus* 1*For Pes Cavus* 6*For Tuberculosis of Tarsus* 1

3. ARTHROPLASTY.

For Hallux Valgus and Rigidus.

Kellar's operation	32
--------------------	-------	-------	-------	-------	----

For fractured head of Radius 1

4. MANIPULATIONS.

For Adhesions.

Spine	6
Shoulder	3
Finger	1
Knee	4
Ankle	5
Foot	4

For Injuries.

Shoulder	1
Fingers	1
Knee	7
Ankle	3

<i>For Congenital Dislocation.</i>	
Hip	4
<i>For Osteomyelitis.</i>	
Knee	1
<i>For Arthritis.</i>	
Spine	1
Shoulder	2
Knee	2
Feet	1
Toe	1
<i>For Supra-spinatus Tear.</i>	
Shoulder	1
<i>For Round Back</i>	2
<i>For Sciatica—Spine</i>	3
<i>For Traumatic Dislocation.</i>	
Shoulder	1
Elbow	1
Wrist	1
Interphalangeal joint	1
Ankle	1
Midtarsal and tarso-metatarsal joint	1
<i>For Fracture-dislocation.</i>	
Elbow	3
Thumb.....	1
Ankle	6
<i>For Tennis Elbow</i>	3
<i>For Sacralisation of Spine</i>	1
 5. SHELF OPERATION.	
For Congenital Dislocation of Hip	7
 6. REMOVAL OF CARTILAGE.	
<i>For torn Semi-lunar Cartilage</i>	60
<i>For Cystic Cartilage</i>	3
 7. REMOVAL OF LOOSE BODIES.	
Elbow	5
Knee	5
Wrist	1

8. EXCISIONS.

For Charcot's Joint.

Head and neck of femur 1

For Arthritis of Hip.

Head and neck of femur 1

For Fractures.

Shoulder—Head of humerus 1

Elbow—Head of radius 1

Wrist—Styloid process 1

For Dislocation.

Wrist—Lower end of ulna 1

For Knock-knee.

Head of tibia 1

For Hammer Toes.

Interphalangeal Joints 14

9. SEQUESTRECTOMY.

For Tuberculosis.

Elbow 1

Hip 1

Ankle 1

10. BIOPSY.

For Tuberculosis.

Elbow 1

Knee 1

For Sarcoma.

Knee 1

Thigh 1

For Arthritis.

Knee 1

For Epithelioma.

Nose and palate 1

11. TRANSPOSITION OF TIBIAL TUBERCLE.

For Slipping Patella..... 4

12. OPEN REDUCTION OF DISLOCATION.

Hip 1

Ankle 1

13. ERASION OF FEMORAL HEAD.

For Arthritis	1
---------------------	---

14. SUTURE OF PATELLA—for fractured patella 3

Tendon and Muscle Operations.

1. MANIPULATION AND WRENCHING OF FEET.

Congenital club foot	19
Metatarsus varus	3
Flat foot	15
Spasmodic flat foot	4

2. TENDON TRANSPLANTATIONS.

For Poliomyelitis.

Flexor sublimus digitorum	2
Extensor ossis metacarpi pollicis	1
Extensor longus digitorum	1
Common Flexor Origin	1

For Encephalo-myelitis.

Extensors of wrist	1
--------------------------	---

For Brachial Plexus lesion.

Triceps to ulna	1
-----------------------	---

For Pes Cavus.

Extensor proprius hallucis	1
----------------------------------	---

For Recurrent Dislocation of Shoulder.

Bankhart's operation	1
Nicola's ,,	2

For Hallux valgus.

Extensor proprius hallucis	1
----------------------------------	---

3. TENTOTOMIES.

For Torticollis.

Sterno-mastoid	17
----------------------	----

For Spastic Paralysis.

Adductors	4
Biceps and Rensor Fascia Femoris	1
Plantar fascia	2

For Spasmodic Flat Foot.

Peronei	7
---------------	---

For Pes Cavus.

Plantar fascia	53
----------------------	----

<i>For Poliomyelitis.</i>		
Adductors		1
Plantar fascia		3
<i>For Congenital Club Foot.</i>		
Plantar fascia		8
<i>For Osteo-arthritis.</i>		
Adductors		1
<i>For Disseminated Sclerosis.</i>		
Hamstrings and adductors		1
<i>For Tuberculous Spine</i>		
Adductors		1
<i>For Freidreich's Ataxia.</i>		
Plantar fascia		1
<i>For G.S.W. Spine.</i>		
Adductors		1
<i>For Spina Bifida (Pes Cavus).</i>		
Plantar fascia		1
<i>For Dupuytren's Contracture</i>		3
<i>For Clawing of Toes.</i>		
Flexors and extensors		4
4. OPEN ELONGATION OF TENDO ACHILLIS.		
For Poliomyelitis		1
„ Spastic Paralysis		3
„ Friedreich's Ataxia		1
„ Shortening of Tendo Achillis		2
5. CLOSED ELONGATION OF TENDO ACHILLIS.		
For Congenital Club Foot		4
„ Spastic Paralysis		2
6. STRETCHING OF TENDO ACHILLIS.		
For Poliomyelitis		1
„ Metatarsus Varus		4
7. REPAIR AND SUTURE OF TENDONS.		
Extensor longus pollicis		2
Extensor tendons of fingers		4
Flexor tendons of fingers		3
Flexor longus pollicis		1
Supra-spinatus tendon		2
Quadriceps		1
Tendo Achillis		1

8.	REPAIR OF LIGAMENT.		
	Ligamentum patellae	1
9.	EXPLORATION OF TENDON SHEATHS.		
	For tuberculous tendon sheaths	2
	„ Trigger thumb	1
10.	SCARIFICATION OF TENDON.....		
	For Tennis Elbow	2

Operations on Nerves.

1.	EXPLORATION OF NERVES.		
	Ulnar and median trunk nerves	1
	Median nerve	2
2.	STOFFELL'S NEURECTOMY.		
	For Spastic Paraplegia	4
	„ Osteo-arthritis	1
3.	TRANSPOSITION OF ULNAR NERVE	2
4.	NEUROLYSIS.		
	Ulnar nerve	2

Miscellaneous Operations.

1.	INCISION AND DRAINAGE OF ABSCESES.		
	<i>For Tuberculosis.</i>		
	Hip	2
	Knee	3
	Shoulder	3
	Spine	2
	<i>For Osteomyelitis.</i>		
	Shoulder	1
	Humerus	1
	Ulna	2
	Ilium	1
